

Equipment Requisition Policy

Section 1: Purpose

This document defines the process for requesting equipment and supplies across departments, including Logistics, Signals, Engineering, Medical, Administration, and IT.

Section 2: Requisition Process

Any staff member may raise a requisition request specifying the item name and quantity required. Requests are reviewed by the department head and marked as Pending, Approved, Rejected, or Fulfilled.

Section 3: Approval Thresholds

Requests for quantities under 5 units are typically approved within 3 working days. Requests for quantities of 5 or more units require additional budget sign-off and may take up to 10 working days for approval.

Section 4: Fulfilment Tracking

Once approved, the fulfilment date is logged against the requisition record. Items not fulfilled within 30 days of approval are automatically flagged for review.

Section 5: Commonly Requested Items

The most frequently requested items include laptops, radio sets, generators, medical kits, vehicle spare parts, and field tents. Departments are encouraged to plan requisitions ahead of quarterly reviews to avoid delays.
